

LIGHTING EFFICIENCY

ONE-STOP EFFICIENCY SHOPSM BOOSTS REBATE POTENTIAL FOR QUALIFYING FACILITIES

The One-Stop Efficiency ShopSM for lighting upgrades offers enhanced rebates and special services for small and mid-sized business facilities, with peak demand of 400 kW or less.

Earn significant rebates while lowering your lighting costs

The One-Stop Efficiency Shop lighting retrofit program offers qualifying businesses:

- A free lighting audit with cost savings recommendations
- Rebate incentives up to 60 percent of installed costs
- Start-to-finish oversight of your lighting upgrade

If you qualify for the One-Stop Efficiency Shop, a representative will

- Walk through your business and offer suggestions to improve lighting and cut costs
- Explain the recommendations, savings and financing options identified in your audit report
- Serve as a liaison between you and your contractor throughout the retrofit process to insure quality installation*
- Complete and submit all rebate paperwork

Financing helps turn on lighting savings

The Center for Energy and Environment offers financing to qualifying customers. Contact the One-Stop Efficiency Shop for financing details, special offers and interest rates.

You can qualify for cash rebates, too

The One-Stop Efficiency Shop is only one part of our Lighting Efficiency program for Minnesota business customers. Lighting Efficiency helps customers large and small qualify for rebates while lowering their lighting costs. You can choose from the following Lighting Efficiency options:

- **Lighting Efficiency retrofit rebates**—available for existing facilities of any size.
- **Lighting Efficiency new construction rebates**—available for new facilities or any facility going through major renovations.
- **Custom Efficiency lighting rebates**—available for energy saving lighting projects not currently included in our standard Lighting Efficiency rebate program.
- **Lighting redesign study and implementation rebates**—study funding and special rebate levels available for completing a redesign study to determine proper lighting levels in an overlit or mislit facility.

** There is no obligation to perform recommended upgrades after completing the free evaluation. In addition, completed retrofits are randomly checked to guarantee high-quality installations and customer satisfaction.*

Start saving now

Contact your Xcel Energy account manager, our **Business Solutions Center** at bsc@xcelenergy.com or the **One-Stop Efficiency Shop** at **612-335-3487** for help determining the best approach for you. We will verify your eligibility and kick-start your lighting savings.

The Center for Energy and Environment administers the One-Stop Efficiency Shop, which is part of our Lighting Efficiency program.

A typical small business spends \$6,000 to \$25,000 on energy annually, and, according to the U.S. Environmental Protection Agency, nearly a quarter of that amount pays for lighting. Improving your lighting is one of the most cost-effective steps that you can take because it saves money on energy bills while boosting lighting quality.
