

Supplemental Energy Application

INSTRUCTIONS: Complete all information on this supplemental application and submit to the Center for Energy and Environment (CEE) with your paid invoice. The bonus rebate must be used exclusively for energy conservation improvements.

Please submit this document with a contractor's invoice documenting the eligible energy conservation improvements.

Minnesota Data Privacy Act/Tennessee Warning:

- The information requested on this Supplement Application will be used to help determine your eligibility for a bonus rebate made possible by the City of Minneapolis through its Climate Legacy Initiative.
- Except for your name, address, and rebate amount, which are public information, all the other information that you are being asked to provide is Private Data on Individuals under the Minnesota Government Data Practices Act, Section 13.462, and Minnesota State Statutes Section 462A.065. All of this information will be provided to CEE. CEE will share your public and certain private data about your home improvement project with the City of Minneapolis to determine your eligibility for assistance and to evaluate the effectiveness of the program in reducing energy consumption. The information may also be provided to others when authorized by State or Federal law.
- You may decline to respond to any question or provide any of the requested information; however, if you do not provide the information, your application for the bonus rebate may not be approved.

Acknowledge that you have read and understand this Tennessee Warning Notice by initialing here: _____

Property Owner Information:

Last Name	First Name	MI
Address to be improved		
City	State	Zip Code
County	Square Footage of Home	

Property Owner Demographics:

We want to better understand who our program is reaching. This information is for aggregate reporting purposes only. Your response to this question in **no** way impacts your eligibility or ability to receive funding.

City of Minneapolis Rebate Amounts

Below is a summary of the eligible energy efficiency improvements. The table includes the relevant utility (Xcel Energy and CenterPoint Energy), and City of Minneapolis rebates. The total of City of Minneapolis and Utility rebates cannot exceed the total cost of installing the system(s).

Eligible Equipment	Required Equipment Specification	Utility Rebate	Green Zone (Up to \$14,000)	Non-Green Zone (Up to \$5,000)
Insulation and Air Sealing				
Attic Insulation + Air Sealing	≥ R-50 or maximum possible with Air Sealing	\$ 1,300	\$ 3,000	\$ 1,300
Wall Insulation	≥ R-11 or maximum possible	\$ 1,500	\$ 3,000	\$ 1,500
Air Source Heat Pumps				
Air Source Heat Pump - Mini Split	16 SEER2 (9.0 EER2), HSFP2 9.5, COP of at least 1.75 at 5° and capacity ratio ≥ 70% at 5°F/47°F	\$ 2,000	\$ 4,000	\$ 1,000
Air Source Heat Pump - Central	15.2 SEER2 (10 EER2), HSFP2 8.1, COP of at least 1.75 at 5° and capacity ratio ≥ 70% at 5°F/47°F	\$ 1,500	\$ 4,000	\$ 1,000
Gas Heating Systems				
Furnace	≥ 97% AFUE installed with a qualifying Air Source Heat Pump	\$ 1,500	\$ 2,500	\$ 1,000
Furnace	96% - 96.9% AFUE installed with a qualifying Air Source Heat Pump	\$ 750	\$ 2,500	\$ 1,000
Boiler (Condensing)	≥ 95% AFUE installed with a qualifying Air Source Heat Pump	\$ 500	\$ 2,500	\$ 1,000
Boiler (Combination)	≥ 95% AFUE installed with a qualifying Air Source Heat Pump	\$ 1,000	\$ 2,500	\$ 1,000
Water Heating				
Heat Pump Water Heaters	Energy STAR certified	\$ 400	\$ 1,500	\$ 200

Terms |

- AFUE – Annual Fuel Utilization Efficiency
- COP – Coefficient of Performance
- EER2 – Energy Efficiency Ratio 2
- HSFP2 – Heating Seasonal Performance Factor 2
- SEER2 – Seasonal Energy Efficiency Rating 2

Green Zone |

Green Zones are officially designated Environmental Justice areas in Minneapolis. The City and community partners designated these areas in 2016 to help prioritize the City of Minneapolis' climate change and energy-related investments.

[See if your property is in a Green Zone.](#)

Deadline |

Applicants must submit their documents to the Center for Energy and Environment by December 15, 2024 (12/15/2024).

The following information must be completed by your Contractor(s):

AIR SOURCE HEAT PUMPS

Air Source Heat Pump (ASHP) must meet the requirements listed in the table below:

System type	SEER2	EER2	HSPF2	COP at 5°F	Capacity Ratio	Utility Rebate
Split ducted (central)	≥15.2	≥10.0	≥8.1	≥1.75	≥ 70% at 5°F/47°F	\$1,500 <i>or</i>
						\$2,000 with a 97% Furnace
Non-ducted (mini splits)	≥16.0	≥9.0	≥9.5	≥1.75	≥ 70% at 5°F/47°F	\$2,000

Note: Equipment with SEER2, EER2, and HSPF2 ratings are tested under the new M1 testing procedures. SEER, EER, and HSPF ratings are being phased out. Products not tested under new M1 procedures can still qualify if they meet equivalent minimum SEER, EER, and HSPF ratings (ie. SEER2 15.2 = SEER 16). Click this [link for a resource](#) explaining how to convert between the old and new testing standards.

Air Source Heat Pump (ASHP)					
Fill out the table below with the information for the new equipment installed.					
System Information					
Air Source Heat Pump type:	Split ducted (central)	<input type="checkbox"/>	Non-ducted (mini split)	<input type="checkbox"/>	
Cooling System:	Replace AC	<input type="checkbox"/>	Replace ASHP	<input type="checkbox"/>	New System <input type="checkbox"/>
Backup Heating System:	Furnace	<input type="checkbox"/>	Boiler	<input type="checkbox"/>	Baseboard Electric <input type="checkbox"/>
Total Cost (\$):			# of outdoor units:

INSULATION-ATTIC AND WALLS

Insulation and air sealing projects must meet the requirements listed in the table below:

Insulation Type	Final R-Value	Air Sealing	Utility Rebate
Attic Insulation	≥ R-50 or maximum possible	Required	\$1,300
Wall Insulation	≥ R-11 or maximum possible	N/A	\$1,500

Attic Insulation

Current R-Value:		
New R-Value:		
Material:		
Total Square Footage of Insulated Attic:		
Total Cost (\$):		

Wall Insulation

Current R-Value (if unknown, use R-5):		
New R-Value:		
Material:		
Total Square Footage of Insulated Wall:		
Total Cost (\$):		

ATTIC AIR SEALING

- Attic air sealing is a prerequisite for attic insulation.
- Testing the air tightness of a home using a calibrated blower door will measure the quantity of air leakage and the effectiveness of air sealing. Blower door testing is recommended.

Pre-blower Door Reading (if performed)	cfm ⁵⁰	Post-blower Door Reading (if performed)	cfm ⁵⁰
